	<b>Examiner</b> Mark S. Graham	<b>Art Unit</b> 3711	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The indicated allowability of claim 12 is withdrawn in view of the newly discovered reference(s) to Nally. Rejections based on the newly cited reference(s) follow.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chang '333 (Chang) in view of Rambow and Nally.

Chang discloses the claimed device with the exception of the type of wood used for the core and the varied thickness of the composite material. However, as disclosed by Rambow it is known in the art to use light woods to form cue sticks. The examiner took official notice that spruce and Sitka spruce are commonly known light woods and such is now admitted prior art. It would have been obvious to one of ordinary skill in the art to have used such woods to form Chang's stick as well if such were the most readily available to the ordinarily skilled artisan or if such provided a cost advantage.

Concerning the particularly claimed density absent a showing of unexpected results, the exact density of Chang's stick would obviously have been up to the ordinarily skilled artisan depending on the weight desired by the user of the stick.

Regarding the varied thickness of the composite layer, Nally teaches that it is known in the art to selectively reinforce desired areas of the cue with composite material. In doing so one is necessarily including a thicker layer of composite material

at those points. It would have been obvious to one of ordinary skill in the art to have done the same with the composite layer on Chang's cue to add extra reinforcement where desired.

Claims 13 is allowed.
